# MyFinePix.com – i18n usecase

- Portál pro značkovou řadu fotoaparátů FUJI
- .com globální doména
- Později prorážet do dalších zemí (uk, pl, it, es,...)
- Sub-sites myfinepix.co.uk, myfinepix.pl,...

# MyFinePix.com – problem 1

- Jedna země → více jazyků
  - myfinepix.ca → angličtina, francouzština
  - myfinepix.co.uk → angličtina, ?
  - myfinepix.pl, myfinepix.com, ...

# MyFinePix.com – problem 2

Sdílený obsah

- Fotogalerie, Soutěže, Články,...

Administrátor země

- vkládat obsah jen do země kam má právo

# MyFinePix.com – problem 3

Diskuzní fórum

- fóra specifická pro zemi
- fóra pro všechny země

# MyFinePix.com – problem 1

myfinepix.com – default - multi-site

Sub-domény

- myfinepix.co.uk

- myfinepix.it

- myfinepix.es

# MyFinePix.com – problem 1

settings.php → MyFinepix Default .com

```
/**  
 * Variable overrides:  
 */  
$conf = array(  
    'site_name' => 'Global Demo',  
);
```

# MyFinePix.com – problem 1

settings.php → MyFinepix sub-site Italy

```
/**  
 * Variable overrides:  
 */  
$conf = array(  
    'site_name' => 'Italy Demo',  
);  
  
$db_prefix = array(  
    'default' => "",  
    'languages' => 'mfp_it.',  
);
```

# MyFinePix.com – problem 2

Sdílený obsah

- sdílené tabulky (kromě .languages) → +

Views pro výpis veškerého obsahu

Language filter

# MyFinePix.com – problem 2

Jak zobrazovat obsah určený jen pro např. co.uk  
a zároveň zobrazovat globální obsah

# MyFinePix.com – problem 2

Jak zobrazovat obsah určený jen pro např. co.uk  
a zároveň zobrazovat globální obsah

Taxonomy – Slovník “Country”

# MyFinePix.com – problem 2

Jak zobrazovat obsah určený jen pro např. co.uk  
a zároveň zobrazovat globální obsah

Taxonomy – Slovník “**Country**”

- Global
- Uk
- It
- Es

# MyFinePix.com – problem 2

Views integrace

# MyFinePix.com – problem 2

Views integrace

Získání `$site_country` ← `settings.php`

# MyFinePix.com – problem 2

settings.php → MyFinepix Default .com

```
/**  
 * Variable overrides:  
 */  
$conf = array(  
    'site_name' => 'Global Demo',  
    'site_country' => 'global',  
);
```

# MyFinePix.com – problem 2

settings.php → MyFinepix sub-site Italy

```
/**  
 * Variable overrides:  
 */  
$conf = array(  
    'site_name' => 'Italy Demo',  
    'site_country' => 'it',  
);  
  
$db_prefix = array(  
    'default' => "",  
    'languages' => 'mfp_it.',  
);
```

# MyFinePix.com – problem 2

Views - taxonomy – argument handler

```
return variable_get('site_country','global');
```

# MyFinePix.com – problem 3

settings.php → MyFinepix sub-site Italy

```
/**  
 * Variable overrides:  
 */  
$conf = array(  
    'site_name' => 'Italy Demo',  
    'site_country' => 'it',  
    'site_forums' => array(1, 2, 3, 4, 5, 7, 9),  
);  
  
$db_prefix = array(  
    ...
```

# MyFinePix.com – problem 3

Views - taxonomy – argument handler

Status: using default values.

Override

**Relationship:**

Do not use a relationship

**Title:**

The title to use when this argument is present. It will override the title of the view and titles from previous arguments. You can use percent substitution here to replace with argument titles. Use "%1" for the first argument, "%2" for the second, etc.

**Breadcrumb:**

The Breadcrumb title to use when this argument is present. If no breadcrumb is setted here, default Title values will be used, see "Title" for percent substitutions.

**Action to take if argument is not present:**

- Display all values
- Hide view / Page not found (404)
- Display empty text
- Summary, sorted ascending
- Summary, sorted descending
- Provide default argument

**Wildcard:**

If this value is received as an argument, the argument will be ignored; i.e. "all values"

**Wildcard title:**

The title to use for the wildcard in substitutions elsewhere.

Provide default argument options

**Default argument type:**

- Fixed entry
- Node ID from URL
- PHP Code
- User ID from URL
- User ID from logged in user

**PHP argument code:**

```
$site_forums = variable_get('site_forums','');
if (is_array($site_forums)) {
return implode('+',$site_forums);
}
```

Enter PHP code that returns a value to use for this argument. Do not use <?php ?>. You must return only a single value for just this argument.

Validator options

**Validator:**

<Basic validation>

**Action to take if argument does not validate:**

Hide view / Page not found (404)

Allow multiple terms per argument.

If selected, users can enter multiple arguments in the form of 1+2+3 or 1,2,3.

Exclude the argument

If selected, the numbers entered in the argument will be excluded rather than limiting the view.

# MyFinePix.com – problem 3

Views - taxonomy – argument handler

```
$site_forums = variable_get('site_forums','');  
if (is_array($site_forums)) {  
    return implode('+', $site_forums);  
}
```
